Summary

Computer Science undergraduate with a strong interest in full stack development and problem-solving. Experienced in building web applications and working with modern technologies, with a focus on writing clean, efficient code. Continuous improvement of skills in Data Structures & Algorithms Seeking opportunities to contribute, learn, and grow in a dynamic development environment.

Education

B. Tech in Computer Science & Engineering (AIML)

2023 – 2027

G.H Raisonni College of Engineering , Nagpur

CGPA: 8.41 / 10

Skills

Languages: Python, JavaScript, C++, SQL

Frontend Technologies: React.js, HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, VS Code

Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Computer Networks (CN), Database Management Systems (DBMS), Operating Systems (OS)

Projects

Secure Cloud File Sharing Platform | GitHub | *HTML, CSS, JavaScript, Local Storage*

Jan 2026 – Apr 2026

- Developed a responsive cloud-style file sharing platform featuring drag-and-drop uploads, upload progress tracking, file search suggestions, and dynamic UI interactions.
- Implemented real-time file filtering, upload history management, and local storage persistence using JavaScript for improved user experience.
- Designed a modern glassmorphism-based responsive interface with modular and reusable HTML, CSS, and JavaScript architecture.
- Deployed the application publicly using GitHub and Netlify for seamless accessibility and hosting.

Weather Forecast Application | GitHub | *HTML, CSS, JavaScript, OpenWeather API*

Dec 2025 – Jan 2026

- Developed a responsive weather forecasting web application that fetches and displays real-time weather data using external APIs.
- Implemented dynamic weather updates including temperature, humidity, wind speed, and weather conditions based on user input.
- Built an interactive and mobile-friendly user interface to ensure smooth user experience across multiple devices.

Real-Time Bus Tracking System (YatraMitra) | GitHub | *Figma, UI/UX Design, Prototyping*

Jan 2026 – Apr 2026

- Designed and prototyped a real-time bus tracking mobile application focused on intuitive UI/UX and seamless user navigation.
- Created interactive wireframes and high-fidelity prototypes for live bus tracking, route selection, and ETA visualization features.
- Improved user accessibility and interaction flow through user-centric interface design and structured navigation planning.

Certifications

CPP Programming Certificate

Python Programming Certificate

C Programming Certificate

NPTEL Certificate

Achievements

- Participated in Smart India Hackathon (SIH) 2025, contributing to solution development and collaborative problem-solving within a team environment.
- Consistently practicing Data Structures and Algorithms (DSA) to strengthen problem-solving and software engineering skills.
- Enhanced communication, analytical thinking, and presentation abilities through academic projects, technical activities, and collaborative learning experiences.
